

Quarterly Engineering Review

Notes Print Optimizer - Q3 snapshot

Session note line 1 with wrap-around summary text for the meeting archive.

Session note line 2 with wrap-around summary text for the meeting archive.

Session note line 3 with wrap-around summary text for the meeting archive.

Session note line 4 with wrap-around summary text for the meeting archive.

Session note line 5 with wrap-around summary text for the meeting archive.

Session note line 6 with wrap-around summary text for the meeting archive.

Session note line 7 with wrap-around summary text for the meeting archive.

Session note line 8 with wrap-around summary text for the meeting archive.

Agenda

1. Pipeline throughput measurements and machine-state caveats
2. WASM kernel head-to-head: hsv, classify, dilate, unsharp
3. Same-window A/B protocol for every kernel change
4. Memory: transient heap deltas per page, peak during 100-page runs
5. Licensing: AGPL surface analysis (MuPDF/PDFium vs pdf.js)

Key Findings

Measured finding 1: kernel-level evidence with byte-level proofs.

Measured finding 2: kernel-level evidence with byte-level proofs.

Measured finding 3: kernel-level evidence with byte-level proofs.

Measured finding 4: kernel-level evidence with byte-level proofs.

Measured finding 5: kernel-level evidence with byte-level proofs.

Measured finding 6: kernel-level evidence with byte-level proofs.

Measured finding 7: kernel-level evidence with byte-level proofs.

Action Items

[RED] item 1

Detail for action item 1 with an owner and a due date.

[GREEN] item 2

Detail for action item 2 with an owner and a due date.

[BLUE] item 3

Detail for action item 3 with an owner and a due date.

[RED] item 4

Detail for action item 4 with an owner and a due date.

[GREEN] item 5

Detail for action item 5 with an owner and a due date.

[BLUE] item 6

Detail for action item 6 with an owner and a due date.
